

W 30 Photoelectric proximity switches: Clear signals even with low remission

	Photoelectric proximity switches, BGS
	Photoelectric proximity switches, energetic

In addition, the sensor offers a range of standard features. These include adjustable light- and dark-switching in the large terminal chamber, switching outputs that can be defined either for PNP, NPN or B configurations, and versions with optional time delay.

Fixed scanning distances of 100, 200 and 305 mm requiring alignment once only; WT 30 sensors can detect even difficult objects. Thanks to their robust housing (with a high enclosure rating of IP 67), these photoelectric proximity switches can also perform their tasks in unpleasant environments. A clear signal is generated for a machine control system even if only a small amount of light is reflected by the object.

◀ Production control in a punching machine – WT 30 photoelectric proximity switches provide the solution.

▼ In a car factory, WT 30 sensors being used to ensure that windscreens are precisely positioned before they are bonded to the vehicle body.

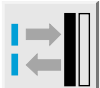

▲ WT 30 used to check the presence of six-packs.

► WT 30 photoelectric proximity switches detecting the location of pallets to control the path of the shrink-wrapper.

Scanning distance
100/200/300 mm

Photoelectric proximity switches

- Infrared light
- Precise background suppression
- Selectable time delays
- Terminal chamber

Dimensional drawing

Adjustments possible

WT 30-02	WT 30-01
WT 30-12	WT 30-11
WT 30-22	WT 30-21

- 1** Direction of movement of the material being scanned
- 2** Alignment sight
- 3** Power indicator
- 4** Mounting holes on both sides, with recesses for M5 hex nuts
- 5** M5 threaded mounting hole – 5.5 mm deep
- 6** Holder for jumpers
- 7** Light-/dark-switching, selected via jumper
a = light-switching, b = dark-switching
- 8** Time control
- 9** ON-delay t_1
- 10** OFF-delay t_2
- 11** Terminal connections

Connection type

All types

Time delay selected via jumpers

0.04 – 12 s

Jumper t_1 connected:
ON-delay

Jumper t_2 connected:
OFF-delay
